

The logo for Harlaxton Energy Networks Limited features the company name in a bold, sans-serif font. The word 'Harlaxton' is in a larger font size than 'Energy Networks Limited'. To the right of the text is a stylized green sunburst or starburst graphic with a central circular element. A long, thin, green comet-like tail extends from the sunburst towards the left, passing behind the text.

Condition 31E – Procurement and use of distribution flexibility services

We, Harlaxton Energy Networks Limited, do not intend to procure flexibility in this regulatory year. Our reason for this outcome is as such whilst Harlaxton Energy Networks are an IDNO the majority of Harlaxton Energy Networks established networks are on new developments and sustainable infrastructures making our assets a low-level concern. Harlaxton Energy Networks has been conscious of future demand and has been proactively catering for increased demand via growing interest in clean energy developments.

Further to this, Harlaxton Energy Networks is also known as the 'last mile' of electricity infrastructure and are connected solely to the upstream DNO and with smaller scaled networks having minimal impact and reduced significance to the DSO data model.

Yours Sincerely

A handwritten signature in black ink, appearing to read 'Lucy Mair', written in a cursive style.

Lucy Mair

Director

Harlaxton Energy Networks Limited
